

SNL70-HXP Form-In-Place

A heat-cure, silver/aluminum-filled silicone elastomer Form-In-Place gasket material.

Laird Technologies introduces its newest line of FIP products—EMI Sentry. These Form-In-Place pastes are extremely fast curing with reliable shielding effectiveness and strength.

Laird Technologies' Form-In-Place is an automated system for dispensing conductive elastomer EMI shielding and grounding gaskets onto metal or plastic substrates. This product is particularly ideal for basestations, PDAs, PC cards, radios, mobile phones, as well as many other cast or plastic enclosures and packaged electronic assemblies.

SNL70-HXP Form-In-Place

A heat-cure, silver/aluminum-filled silicone elastomer Form-In-Place gasket material.

SNL70-HXP is the heat temperature cured silver/aluminum paste in the new EMI Sentry product family. This silver/aluminum paste is high strength, providing excellent environmental and EMI protection. Products in the EMI Sentry line all have superior adhesion strength, strong reliability in low compression sets, as well as heat and humidity resistance.
